

I. From the Distance again – the Left's Victories and Losses through History, Recently

And so the news goes that the left has won everywhere with even Lula liberating the black people in Brazil recently by walking into a hotel and talking to a black man for the first time in its history. The black people are in movements in Brazil at the moment from MST to working class industrial zones which then is a shifting ensemble of groups and series as Rio de Janero is finally with its Christ statue living which means Christianity is back as liberation theology all over black Brazil.

II. 1990s and Public and Private Ethics Co-operating

When Sirohi was young he was busy advising a perfect compromise between markets and state economics which then receives its pure leftist culture and mass power which failed right after he stopped talking because of the dot.com styles of semio-capital becoming fashion – for what reason? Sirohi answers and asks, - in some search of paradise, - or business paradise of course from America – that we want not a simple Torah economy of 1 trillion at least and 50 trillion at most but in fact a newer creative environment in American style developments necessary for their style capitalism – that in fact it has to get more “creative”. That Americanisation which sustained the 1990s was now bullish on further.

III. 2020s – EuroAmerican and finally America Listens to in fact the World Bank

So of course Americanisation fails, and crime goes up because CIA and IBM has taken to decentralized flows of creative desire machines and cartel praxis.

Sirohi wanted World Bank to be in charge and that just about did it, with the additional Deterior as the new Hegemon which dictates profits at the highest possible so no more American agendas.

IV. Modelling the Future – Am I alive? And where is it going?

After that Sirohi develops statistics, mathematical lines of reasoning and philosophy, even economics and health companies and hospitals all of which take life spans from 80 years at most and an average of 40 – 60 years to in fact eternal life in that Jewish sense and Buddhist rebirth promised by America when it was founded in the Lincoln period and an agenda shelved with the Patent policy of American capitalism which makes medicines generic only.
